Attention: DME Providers

Effective August 1, 2002, procedure code A4221 (Supplies for maintenance of drug infusion catheter, per week) is limited to three supply kits per week; no more than twelve supply kits per month. These supply kits must be prescribed as medically necessary by the physician. If additional supply kits are needed, an EPSDT screening and a prior authorization must be submitted to Medicaid for review and approval.

If you have any questions concerning this Alert letter, please contact the Alabama Medicaid Long Term Care Provider / Recipient Services at (334) 353-5710.
